

> *Making it easy
to get energy-fit.*

Ecofab takes the guesswork and the burden of home energy refits off your shoulders. Our services don't end with an audit report.

Ecofab energy experts make your energy refit happen.

- Conservation refits
- Energy audits
- Efficiency measures
- Weatherization
- Renewable energy systems

No additional to-do list – just energy savings and a healthier home.

> *Ecofab is a socially
conscious, sustainable
building partnership.*

We believe that sustainability begins with good energy habits at home – yours, ours, and the greater Puget Sound community.

On-the-spot energy refits.

Think CFL bulbs and water-saver fixtures. You not only get an audit, but also start saving energy and cash instantly!

Reduce your energy costs.

Savings up to \$1,200 annually for a typical single family home.

Reduce your stress footprint.

Rebates, tax incentives – who has time to pull it all together? Ecofab. We know what’s available – rebates (up to \$2,800!) and tax incentives for renewables. We take care of the paperwork – you simply save.

Reduce your carbon footprint.

With efficiency improvements, you can easily prevent 2 tons of carbon emissions per year!

Can’t go from CFLs to solar panels in a single project?

Tiered services and pricing mean you can start small and finish big – later. Each tier of energy refit services ties into the next; you choose how much to do and when.

Energy Refit Services.

- Home performance evaluations, energy audits, action plans
- Energy refits, efficiency measures, weatherization
- Renewable energy systems

Ecofab takes care of it all.

- Energy audits
- Retrofit and efficiency upgrades
- Heating systems
- Ventilation systems

- Duct sealing or replacement
- Programmable thermostats
- Windows and doors
- Energy efficient lighting and appliances
- Water efficiency upgrades
- Water heaters
- Caulking and weather stripping
- Renewable energy systems
- Performance verifications

> *Here are just a few of the community-building efforts our profits support:*

Sustainable design for housing in distressed areas; Scholarships for low-income youth in green training programs; Real change for homeless populations in Puget Sound.

Find the right (re)fit.

One size doesn’t fit all. Ecofab looks at logical energy service breakpoints, as well as cost vs. savings potential. Adjustments to tiers make our solution customizable to your home’s unique needs.

Sample cost vs. savings potential for a 2,000 square-foot single family home built in 1944.

Home Energy Improvements	Cost w/rebate	Annual Savings	Payback (years)
Replace lightbulbs with CFLs	\$32	\$40	0.7
Replace furnace with Energy Star and seal ducts	\$3,850	\$296	13
Air sealing the home	\$400	\$316	1.3
Insulate whole home, ducts and air seal	\$2,484	\$450	5.5
Comprehensive home retrofit	\$6,818	\$790	8.6
